Football

A meticulous and adaptable front-end developer skilled in building interactive interfaces using HTML, CSS, JavaScript, and the React.js framework. Proficient in diagnosing technical issues and delivering effective solutions. Successfully completed a front-end development course and aspire to join a technical team to utilize my skills and advance my professional career.

Skills

User interface development

I build and design attractive web pages using HTML and .CSS I have experience in JavaScript including variables, conditional structures, loops, and functions. Able to work with arrays and objects. Use jQuery to interact with the DOM and develop dynamic applications. I have done several internship projects including a coffee shop website.

Bootstrap

I am proficient in using Bootstrap to build modern, responsive interfaces using System Grid and Containers to organize content. I can use Row and Col to adjust the distribution of elements on the page. I leverage Media Queries to make the design adaptable to different devices. I have built a YouTube-like site and 5 landing pages, including a Portfolio landing page with a timeline of acquired skills.

React.js

Able to use React.js framework to build responsive web applications, I use Reusable Components to enhance code efficiency, with Styled Components to style user interfaces. I implemented an e-commerce project.

Webpack

Proficient in configuring and managing projects using Webpack, and have experience with Splitting Code techniques to improve application performance and reduce file size. Proficient in uploading projects to GitHub repository and sharing them via Page GitHub for display.
